steghide 0.5.1 Cheatsheet (ingenieriainformatica.uniovi.es)
Classic steganography tool

http://steghide.sourceforge.net/

GENERAL USAGE

```
./steghide <first argument> <options>
```

NOTES

The image you use must be of a compatible format (typically .jpg is)

```
root@kali:~/Descargas# steghide extract -sf lady-in-yoga.jpg
Anotar salvoconducto:
anot los datos extra dos e/"secret.txt".
root@kali:~/Descargas#
```

OPTIONS

Possible First arguments (one is mandatory)	Embedding Options
embed, --embed: embed data	**-cf <filename>**: embed into the file <filename>
encinfo, --encinfo: display a list of supported encryption algorithms	**-cf, --coverfile**: select cover-file
extract, --extract: extract data	**-e <a>[<m>]|<m>[<a>]**: specify an encryption algorithm and/or mode
help, --help: display this usage information	**-e none**: do not encrypt data before embedding
info <filename>: display information about <filename>	**-e, --encryption**: select encryption parameters
info, --info: display information about a cover- or stego-file	**-ef <filename>**: embed the file <filename>
license, --license: display steghide's license	**-ef, --embedfile**: select file to be embedded
version, --version: display version information	**-f, --force**: overwrite existing files
Extracting Options	**-K, --nochecksum**: do not embed crc32 checksum of embedded data
-f, --force: overwrite existing files	**-N, --dontembedname**: do not embed the name of the original file
-p <passphrase>: use <passphrase> to extract data	**-p <passphrase>**: use <passphrase> to embed data
-p, --passphrase: specify passphrase	**-p, --passphrase**: specify passphrase
-q, --quiet: suppress information messages	**-q, --quiet**: suppress information messages
-sf <filename>: extract data from <filename>	**-sf <filename>**: write result to <filename> instead of cover-file
-sf, --stegofile: select stego file	**-sf, --stegofile**: select stego file
-v, --verbose: display detailed information	**-v, --verbose**: display detailed information
-xf <filename>: write the extracted data to <filename>	**-z <l>**: using level <l> (1 best speed...9 best compression)
-xf, --extractfile: select file name for extracted data	**-z, --compress**: compress data before embedding (default)
EXAMPLES	**-Z, --dontcompress**: do not compress data before embedding
To embed emb.txt in cvr.jpg: steghide embed -cf cvr.jpg -ef emb.txt	**Options for the Info Command**
To extract embedded data from stg.jpg: steghide extract -sf stg.jpg	**-p, --passphrase**: specify passphrase
	-p <passphrase>: use <passphrase> to get info about embedded data
